<https://www.linkedin.com/in/sahil-sagar-7aa429262/>

Enthusiastic and skilled web developer with hands-on experience gained through a dynamic internship. Proficient in ReactJs, NodeJs, ExpressJs, Mongodb, JavaScript, and responsive design principles, with a keen eye for user experience and interface aesthetics. Proven ability to collaborate effectively in cross-functional teams to deliver high-quality, scalable, and visually appealing web solutions.

EXPERIENCE

• FRONTEND DEVELOPER INTERN

Circle Health

2023- Present

Achievements

- **Dashboard:-** Collaborated in the creation of a new HR dashboard for the company, contributing to the enhancement of data visualization and decision-making processes. **Played a key role in Developing and implementing user-friendly features in rReactJS.**
- **Physiotherapist EMR:-** Implemented draggable and exercise search feature to physiotherapist EMR in ReactJs to help care managers rearrange and search the exercises according to them and made UI/UX clean and easy to use.
- **Newsletter:-** Developed an engaging newsletter using HTML, CSS, and JavaScript, incorporating dynamic data visualization elements. This initiative not only enhanced the visual appeal of the newsletter but also provided insightful data representation for improved communication.
- **Web scraping:-** Developed a powerful web scraping function using Node.js to improve data collection efficiency at Circle Health. Also optimized the code by adding Worker threads for parallel processing in node js to improve the overall performance.
- **Landing pages:-** Created dynamic and visually appealing landing pages by seamlessly integrating HTML, CSS, and JavaScript, enhancing user engagement and interaction.

B.COM (HONS), ACCOUNTING AND BUSINESS/MANAGEMENT

College of Commerce, Arts & Science.

2020 - 2023

PERSONAL PROJECTS

- [HACKER NEWS](#)

2023 - 2024

- Hacker News is a clone of the original Hacker News by Y-combinator built on react.
- Mui and Bootstrap are used to make the UI/UX clean and visually appealing.
- This app uses the original live API provided by the hacker news community to render the live information on UI.

- [TO DO LIST](#)

2023 - 2024

- This is a MERN stack application allows user to do CRUD operation on task.
- Mui and Bootstrap are used to make the UI/UX clean and visually appealing.
- This app uses mongodb database to store the data.

- [DAILY NEWS](#)

2023 - 2024

- Daily news is built on MERN stack technology with authentication, Users have to sign in or sign up first to enter the application.
- This application has several categories like - business, sports, politics, health, and technology that help the user to see only those news in which the user is interested.
- Mui, tailwind and Bootstrap are used to make the UI/UX clean and visually appealing.
- This app uses mongodb database to store the data.

Note - All the projects mentioned above were completed by me in my learning period from the front end to the backend these applications are hosted on the Render hosting platform you can click the name to visit the app.
